What Is mSpy?

mSpy is a brand of mobile and computer monitoring software for **iOS, Android, Windows, and macOS**[reference:2]. The app monitors and logs user activity on the client device and sends the data to a personalized dashboard. Data that users can monitor includes **text messages, calls, GPS locations, social media chats, and more**[reference:3].

mSpy was launched in **2010** by Altercon Group[reference:4]. In 2012, the application

expanded to monitor computers running Windows and macOS[reference:5]. By 2014, the business had grown nearly **400%**, and user numbers exceeded 1 million[reference:6]. In 2015, mSpy received the **Parents Tested Parents Approved (PTPA) Winner's Seal of Approval** in the United States[reference:7].

Key Features of mSpy

mSpy is packed with powerful monitoring features. Here's a look at what you can do:

Social Media Monitoring

Read chats on WhatsApp, Snapchat, Instagram, Facebook Messenger, Telegram, Viber, LINE, Skype, Tinder, Kik, and Google Chat[reference:8][reference:9].

GPS Location & Geofencing

Track real-time location, view route history, and set geofencing boundaries with instant alerts when they enter or leave safe zones[reference:10][reference:11].

Keylogger

Capture every keystroke they type on their device — including messages, searches, and passwords[reference:12][reference:13].

Call & Text Monitoring

View detailed call logs with timestamps and duration, and read every text message — including photos and videos[reference:14].

Screen Recorder

mSpy regularly takes screenshots of their activity and uploads them to your Control Panel for visual proof[reference:15].

App Blocker & Web Filter

App Blocker & Web Filter

Block specific apps and websites to keep them away from inappropriate content[reference:16][reference:17].

Keyword Alerts

Set custom keywords in your Control Panel and get alerted if they come up in chat or search[reference:18].

Stealth Mode

Monitor their activities without them knowing — the app runs hidden in the background[reference:19].

Compatibility & Device Support

mSpy is compatible with a wide range of devices and operating

systems[reference:22]. Here's what you need to know:

Platform	Requirements	Installation Method	Features Available
Android	Android OS 5 or higher[reference:23]	Physical access required to install APK[reference:24]	Full features including social media, keylogger, screen recorder[reference:25]
iPhone (iCloud Sync)	iCloud credentials & backup enabled[reference:26]	Remote — no physical access needed[reference:27]	Contacts, notes, calendar, photos, files, reminders[reference:28]
iPhone (Wi-Fi Sync)	Physical access for first sync, USB cable, PC/Mac[reference:29]	Local sync via computer[reference:30]	Additional social media data[reference:31]
Windows / macOS	Windows 10+ or macOS 10.15+[reference:32]	Install on target computer[reference:33]	Computer activity monitoring[reference:34]

Note: iOS features are more limited without jailbreak. For full monitoring capabilities on Android, the device may need to be rooted[reference:35].

How to Install mSpy

The installation process varies depending on the target device. Here are the general steps:

For Android

1. **Purchase a subscription** — Visit the mSpy website via [this affiliate link](#) and choose your plan.
2. **Get physical access** — You'll need 5–10 minutes of physical access to the target Android device[reference:36].
3. **Download and install** — Download the installation file from the mSpy website and install it on the target device[reference:37].
4. **Grant permissions** — Allow all required permissions (SMS, Contacts, Notifications, Accessibility, Location)[reference:38].
5. **Enable stealth mode** — Hide the app icon so it runs in the background unnoticed[reference:39].

6. **Start monitoring** — Log in to your mSpy account on any computer or phone to view the target device's activity[reference:40].

For iPhone (iCloud Sync — No Jailbreak)

1. **Create an account** — Go to mSpy.com and create your account[reference:41].
2. **Choose iOS device** — Select the type of device you want to monitor[reference:42].
3. **Enter iCloud credentials** — Provide the target device's iCloud username and password[reference:43].
4. **Enter verification code** — A code will appear on the target device. Enter it in the iCloud Sync page[reference:44].
5. **Start monitoring** — Log in to your mSpy dashboard to view the synced data[reference:45].

Note: The iCloud account owner will receive an email notification that a new device is being synced[reference:46].

Pros & Cons of mSpy

✓ Pros

- Read full chats on 12+ social media platforms[reference:47]
- GPS location tracking and geofencing alerts[reference:48]
- App blocker and website blocker[reference:49]
- Keyword alerts for safety monitoring[reference:50]
- Stealth mode for discreet monitoring[reference:51]
- Works on Android, iOS,

✗ Cons

- No screen time schedules or app time limits[reference:55]
- Some features are extremely invasive (remote camera access, screen recording) [reference:56]
- May require rooting or jailbreaking for full features[reference:57]
- No free plan, free trial, or money-back guarantee[reference:58]

Windows, and
macOS[reference:52]

- Long track record since 2010[reference:53]
- Clean, intuitive dashboard[reference:54]

- Pricier than some competitors[reference:59]
- iOS features limited without jailbreak[reference:60]
- Has experienced data breaches in the past[reference:61]
- Has been characterized as "stalkerware"[reference:62]

Legal & Ethical Warning

mSpy is a powerful monitoring tool. It is **illegal** to install monitoring software on someone's device without their knowledge or consent in many jurisdictions. If you want to monitor an adult, you **must** inform them and obtain their consent[reference:63]. mSpy has been featured in coverage of spyware used against victims of stalking and domestic violence[reference:64]. Always use this software responsibly and in compliance with local laws.

Frequently Asked Questions

Is mSpy legal?

mSpy is legal to use **on devices you own** or when you have explicit consent from the device owner[reference:65]. Using it without consent may violate privacy laws in your jurisdiction.

Does mSpy work on iPhones?

Yes. mSpy works on iPhones via **iCloud Sync** (no jailbreak required) or **Wi-Fi Sync** with physical access[reference:66]. However, iOS features are more limited than Android[reference:67].

Can the person being monitored find out?

mSpy offers **Stealth Mode** that hides the app icon[reference:68]. However, on iPhone via iCloud Sync, the account owner receives an email notification[reference:69].

Is there a free trial?

No. mSpy does **not** offer a free trial or a free plan[reference:70]. However, you can explore an **interactive online demo** on their website to see how the app works before purchasing[reference:71].

Does mSpy work without rooting or jailbreaking?

Yes, but with limitations. On Android, basic features work without root, but **full features require rooting**[reference:72]. On iPhone, iCloud Sync works without jailbreak but provides fewer features[reference:73].

What devices does mSpy support?

mSpy supports **Android (OS 5+), iPhone, iPad, Windows, and macOS** devices[reference:74][reference:75].

How much does mSpy cost?

mSpy Premium starts at **\$48.99/month**, with discounts for longer subscriptions — as low as **\$10.74/month** on the annual plan[reference:76]. Extreme and Ultimate plans are custom-priced[reference:77].
